

The purpose of this document is to aid the Installer or Service Person in properly installing and troubleshooting the NC-102D Controller within a Cornell Nurse Call System.

If this is your first Dual or Triple-Status Cornell Nurse Call System, it is suggested that you should read the entire manual, in order to thoroughly familiarize yourself with this key component of the system.

This manual consists of the following sections:

TABLE OF CONTENTS:

Section 1	FUNCTIONAL DESCRIPTION This section will help you understand the terminology used within the NC-102D, and theory of operation	Pages 1.1 – 1.4
Section 2	CALIBRATION PROCEDURE Procedure for field calibration of NC-102D	Page 2.1
Section 3	INSTALL / TROUBLESHOOTING GUIDE Provides guidance in troubleshooting NC-102D / related problems	Pages 3.1 – 3.8
Section 5	TERMINAL DEFINITIONS Describes intended function and limitation of each NC-102D Termination	Pages 4.1 – 4.5
