FA575 Repeater

AURA
by CORNELL

FA575 Repeater

- Effectively enhances the range of transmissions without programming
- Signal Synchronization Processing™ minimizes the excessive signal generation problem that occurs with conventional store-and forward repeaters
- Easy to install. Just mount and plug into an AC outlet
- Flexible design monitors battery, protects case against tamper (requires optional contacts)
- Repeater can be programmed as a point for supervising the radio link from the repeater to home receiver
- Attractive weatherproof housing
- Allows a virtually unlimited number of repeaters to be added to any job
- Allows repeater to be customized for each application
- Perfectly suited for indoor or outdoor installations

FA575 High Power Indoor Repeater Features

The FA570 is the same repeater as the FA575 without the ACC640 outdoor housing that accommodates a back-up battery.
