

LIGHT STATUS SYSTEMS BY CORNELL

FLEXIBLE • VERSATILE • ECONOMICAL

The Light Status System

Provides visual notification / light signals that can meet the needs of almost any facility.

Provides a means to effectively coordinate and manage room statuses or other indication via:

- Buttons light up to provide visual status of a room that is occupied / in use
- Corridor lights can provide additional visual notification of a room status
- A central LED panel for monitoring the system activity from one location
- 3-way switching capabilities to turn lights ON/OFF from two locations
- Discrete room status indication

Custom Features:

A-4448-1 “Easy-Label” Annunciator Panel

- Room labels are easily customizable using our templates
- Labels print on standard 8.5” x 11” paper or vellum
- Custom color LEDs are available upon request (default is all red LEDs)
- 48 LEDs per panel (4 columns of 12)
- Various pushbutton cap colors available
- Various corridor light color options
- Pushbutton stations come with 1 or more buttons as needed
