

PRODUCT OVERVIEW

NURSE/EMERGENCY CALL

InForm Mobile Activity Management Platform

InForm Emergency Call is now an inclusive Resident Care and Staff Communication System that notifies staff of the resident calls for assistance, and also provides information to better manage the request. Communicating to management not only who took the call and how long it took to resolve, but also what activities were required, i.e. bathroom, dressing, etc. This data provides information to make the staff more efficient. Also, text and voice communication between staff and custom reporting enhance business efficiency.

IndePendant - Emergency Call

Enjoy the flexibility of wired and/or wireless call stations with the simplicity of text messaging to staff pocket pagers or wall mounted displays.

Call Monitoring, Reporting and Multisystems

The monitoring and reporting features of InForm and IndePendant allow attentive management of alarm activity. The flexible interface allows the consolidation of wired and wireless call stations combining both Cornell and other manufacturers' products to upgrade a new or existing facility.

Tone Visual Wired Nurse Call, 4000 Series

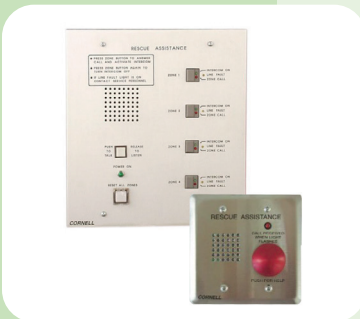

The UL 1069 Listed tone visual nurse call system is designed to be reliable, flexible, economical and durable for the senior housing and health care markets. Add optional pocket pagers or call displays for improved staff efficiency.

AREA OF REFUGE/RESCUE

Digital Emergency Two-way Communication

Sentinel, our all-digital area of refuge system is a state-of-the-art IBC compliant solution that's optimal for use in any multi-level building with virtually unlimited scalability in buildings campuswide. The system features multiple master control panels and two-way communications technology offering exceptional voice quality and leading-edge hardware to ensure clear communication to emergency personnel.

Analog Area of Rescue/Refuge, 4200 Series

The Rescue Assistance System is an American with Disabilities Act (ADA) two way voice compliant analog alarm system that has been a market leader in providing evacuation assistance in times of emergency. The system is time proven for durability and reliability.

And for your convenience, ADA-approved instruction and room ID signs are also available from Cornell.

Cornell has provided emergency call systems for more than 60 years. Our current product line includes Nurse Call, Door Monitoring, Rescue Assistance, Pocket Paging, Data Collection and Wireless Emergency Response Systems. In addition, we also design and manufacture custom annunciator panels.

Our strength is building customized communication solutions with standard components. A typical system is shipped within two weeks of receiving the order. We also pride ourselves on our helpful technical and sales staffs. Call us at 1-800-558-8957. Someone is always available to answer your questions.
