

WE LOOK AT YOUR DATA CHALLENGES DIFFERENTLY

We began six decades ago as a state-of-the-art emergency call system provider and have evolved into an effective communications technology leader. As senior community care and area of refuge needs have evolved, so has our company.

Today, Cornell Technologies is excited to showcase a new era of people-centered solutions. We are more than just hardware and software designed to communicate a vital need. We build solutions from the ground up to enhance safety, improve response times, and strengthen connections with those in need.

We also pride ourselves on our helpful technical and sales experts who provide the care and attention to help you meet your customers' needs.

What difference will this make to your community? See for yourself how powerful meaningful connections can be.

SIX DECADES OF
EMERGENCY
COMMUNICATION
LEADERSHIP
AND INNOVATION
CAN TAKE YOU**

OUR STRENGTH IS PROVIDING CUSTOM COMMUNICATION SOLUTIONS UTILIZING STANDARD COMPONENTS.

Our Innovative Inform Solution Redefines Communication Efficiency.

Improve resident and family member satisfaction

Empower staff; reduce costly turnover

Optimize operational efficiency

Generate revenue and mitigate risk

We'll help you gather more in-depth, actionable nurse call data effectively, which then gives you more time for meaningful connections within your community. The InForm system also enables the most robust aggregation of data types possible, including text, voice, video, images and more.

SENTINELTM ((●)) EMERGENCY COMMUNICATIONS

THE REASONS TO CHOOSE SENTINEL ARE ALL AROUND YOU

Code requirements for multi-level buildings mean the opportunities to install Sentinel are virtually limitless.

REDEFINING AREA OF REFUGE (AOR) EMERGENCY 2-WAY COMMUNICATION
