

WE LOOK AT YOUR DATA INTEGRATION CHALLENGES DIFFERENTLY

InForm Mobile manages more data so you can manage more meaningful connections.

What began as the state-of-the-art nurse call system has rapidly evolved into the key to more effective senior care community management. Our innovative solution redefines communication efficiency. It gathers more in-depth, actionable nurse call data. And it enables the most robust aggregation of data types possible, including text, voice, video, images and more. What difference can it make to your community? See just how powerful more meaningful connections can be.

TECHNOLOGY THAT DOES MORE FOR YOU

Improve resident & family satisfaction by minimizing response times, enhancing safety & facilitating communications

Empower staff with a single point of contact solution that uniquely cuts precious seconds & frustrations from every interaction

Drive continuous improvement through convenient access to more actionable data & easily customized reporting

Effortlessly minimize lifetime operating costs via remote system monitoring, maintenance & updates

Arrange a FREE on-line or in-person demo today
See for yourself why InForm Mobile is a gamechanger.

Make life simpler for you, your team & residents

It's a simple premise: Make things easier and better for residents, staff and management. That's why we focused on creating the most robust solution possible and made it simple to implement, utilize and maintain. So what really makes InForm different? Take a look.

More ways to expedite Nurse Call response times

- **Staff-to-Staff Voice/Text/Chat** enables staff to work more efficiently as a group when alerts are received.
- **Native-Enabled SIP Technology** uniquely allows staff to seamlessly move from one app to the next without having to toggle in and out of each app.
- **2-Way Wireless Resident-to-Staff Communication** lets staff instantly be in touch with residents when an alert comes in to more efficiently triage the situation and make sure the right personnel for the job are assigned from the start.

More detailed time-stamped documentation for more insightful, actionable reporting

- **Closed-Loop Documentation** includes recording the alert notification, as well as the reason for the alert, who took the alert and the length of time to reset and resolve the alert.
- **Justify Care Leveling Increases** with detailed reports

More innovative solutions to senior care community challenges

- **Resident Event Scheduling** assigns staff to ensure residents don't miss appointments and activities.
- **Video Doorbell Capability** conveniently enhances community security, visually and audibly notifying staff when visitors are at the door.
- **Extensive Systems Integration** includes Wander Management, with Fall Detection and EHR on the horizon.

System Activity Data Reports

InForm lets you pull call reports with information including

All Calls

- Resident/location
- Device
- Caregiver
- Reason
- Shift
- Response Time

Zone

- Text Chat History
- Login History
- Export Reports
- PDF & Excel

Optimize resident safety and satisfaction

Enhance family satisfaction

Redefine staff efficiency and minimize costly turnover

Support continuous improvement to drive financial success
