

CALL FOR AID SYSTEMS

KB-111 Call Cord Kit

KE-101 Push Button Kit

KE-114 Pull Cord Kit

Healthcare and commercial customers utilize a small *Call for Aid System* to insure individuals have a method to request staff assistance. Three options are offered to allow selection of the call station device (button cord, push button, or pull string).

Some applications include: Dialysis bathrooms and chemotherapy.

The three systems will include:

- 1) A power supply which can handle up to two call stations.
- 2) A corridor light with tone to notify the need for assistance.
- 3) Select your call station:
 - a. KB-111 Single call cord station with the associated 10 ft call cord
 - b. KE-101 Two push button stations
 - c. KE-114 Two pull cord stations
