

Sanipull Ribbon Pull System SP-ST

Description: The Sanipull ribbon pull system (SP-ST) offers proactive prevention of facility acquired infection (in conjunction with good housekeeping practices), economic retrofit pull solution that is durable and quick to install, protects fixtures from over-force damage, and disinfected easily with standard cleaning procedures and disinfectants.

Operation: When used with Cornell System, the Sanipull ribbon pull system retrofits to any pull cord station for an effective infectious control solution.

Options: Easy to use Grab Handle (SP-HK) can be added to any Sanipull ribbon pull system.

Mounting: See Cornell instructions on how to install the Sanipull ribbon pull system onto an existing pull cord station.

Engineering Specifications: The contractor shall furnish and install the CORNELL Sanipull ribbon pull system SP-ST attaching to a pull cord station per specifications. Sanitary pull cords shall be disinfected per housekeeping policy.

Technical Information:

- Dimensions: 12mm Wide, 6' Long
