

Smoke Detector Alarm - TR-S200E

Wireless Smoke/Heat Detector/Transmitter

Wireless Smoke Detectors can be integrated with the AURA & inform wireless call systems.

Description: The TR-S200E wireless smoke/heat detector features an onboard sounder, a smoke and heat sensor, an LED set and local test capability.

Operation: When used with a Cornell system, this device wirelessly monitors smoke/heat detection continually. It is self-monitoring, alerting the user when cleaning is needed or batteries are low, and automatically supervising the radio link.

Mounting: Mounting hardware included.

Technical Information:

- Dimensions: 5.4" Diameter x 2.4"
- Power: 3.0V Lithium Battery Replacement: CR123A (2-Required)
- Battery Life: 3-5 years
- Operating Environment: 32-100°F Indoor Non-Condensing
- Sounder: 85db @ 3M, Temporal output
- Agency Listing(s): UL 217, NFPA 72
